Author & Actor

Three Elements of Communication

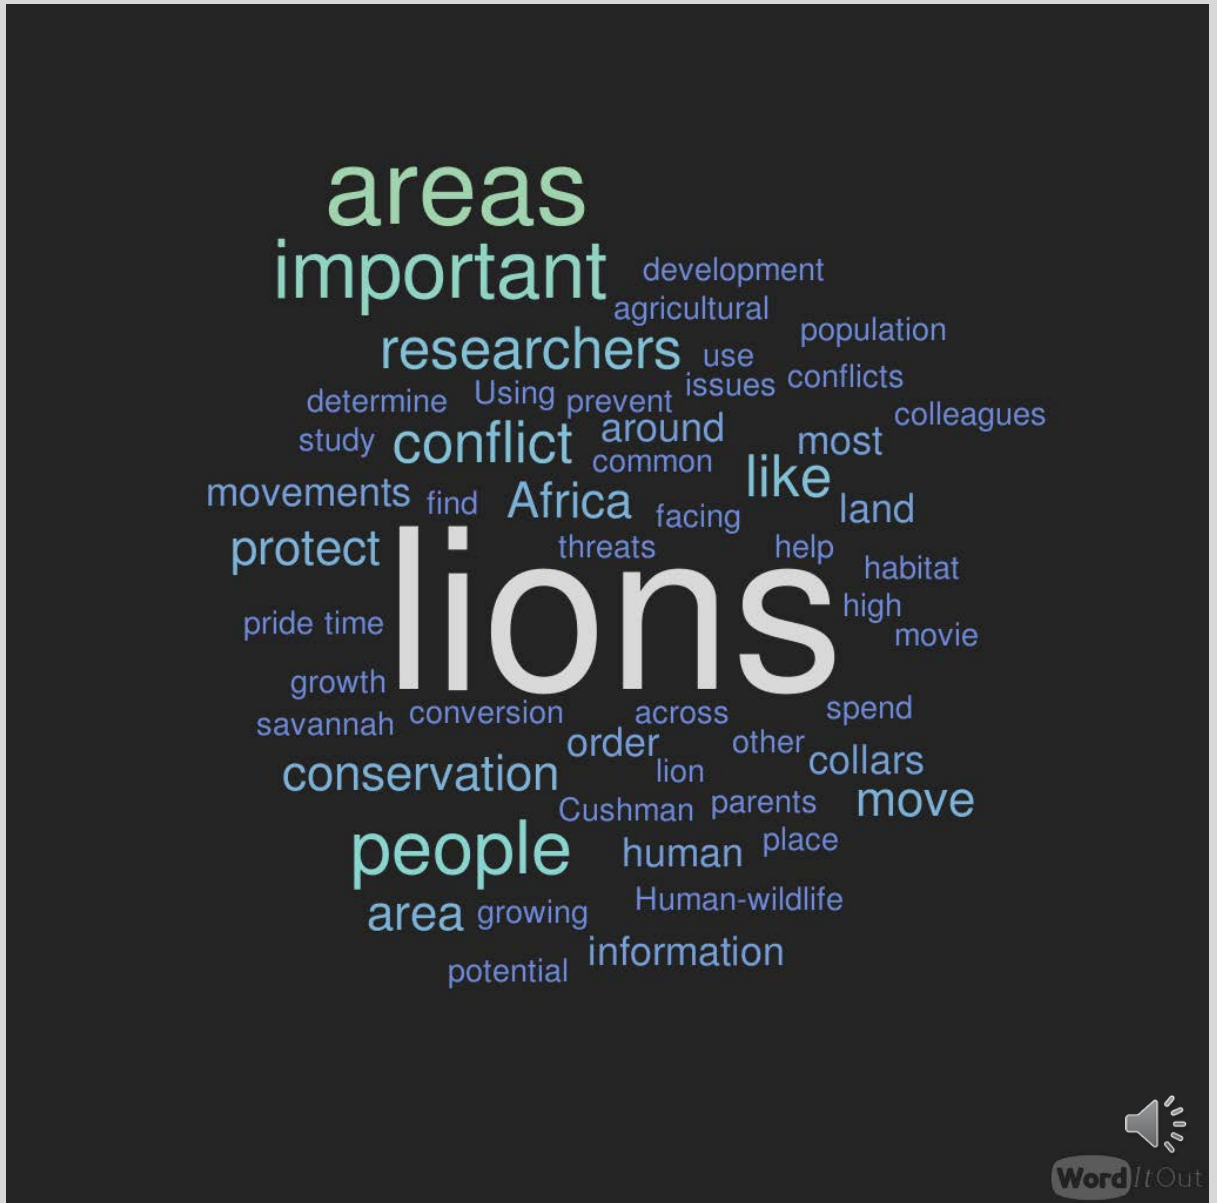

- Storytelling
- Delivery
- Improvisation

“The Story...Matters, Not Just the Ending”

--Paul Lockhart

Storytelling

- Break away from the norm
 - Suspense! Surprise!
- Clear structure and purpose: So what?
- Clarity and focus: What is the take-away message?

Lion Podcasts

Africa's human population is expected to increase threefold by the end of this century and growth is expected to be highest near protected areas....

Accelerating declines of carnivores as a result of human-carnivore conflict and habitat loss are likely.

The movie the lion king has been captivating audiences since 1994. ... Many people dream of visiting Africa and seeing lions in their natural habitat.

However, ***people may be the bigger threat that lions face.***

Lion Podcasts

Spatial prioritization of conservation actions is ***critical*** given extensive land use redesignations that are reducing the extent and increasing the fragmentation of lion populations.

It is ***important*** to look at how and where animals move...to prevent issues like inbreeding and ... common issues between local people and lions...

Identifying these areas allowed the researchers to determine where conservation actions should be placed to best protect lions and people.

Storytelling

- Break away from the norm
 - Suspense! Surprise!
- Clear structure and purpose: So what?
- Clarity and focus: What is the take-away message?
- Analogy and metaphor

Lion Podcasts

[G]rowth is expected to be highest near protected areas.

The fastest growing areas in Africa are along the borders of protected areas. ***This would be like the US having major human development occurring around Yellowstone and Yosemite national parks as opposed to around metropolitan areas.***

Microbe Communities

Scientists...research...microbe communities...by looking at the community as a whole, and making educated guesses about the characteristics of individuals...

However, I only have to say, "***You're from Montana, you ride a horse to school, right?***" for you to see just how much we might miss by drawing conclusions about individuals by only looking at the community.

SOFC Operation Times

40,000 hours is 1,667 days
1,667 days is 4.6 years!

“It’s All in the Delivery”

- Animate with voice 
- Nonverbal communication
- Visuals

“All the World’s a Stage”

--Shakespeare

Improvisation

- Normalize stress and vulnerability
- Build confidence
- Actively listen and adapt to audience
- Develop stage presence

Implications

- Broader impacts apply to *anyone*
- Faculty benefits
 - “Yes, **AND**” vs. “Yes, **BUT**”
 - Slides + Words
 - Ongoing

Breaking the Batteries: With Purpose

Input

Tweak the "recipe" by adding new material (Aluminum titanate)

Three-point bending

Output

$h = 0.5 \text{ mm}$

$w = 5 \text{ mm}$

$l = 25 \text{ mm}$

0.5 mm = 5 human hairs

Strength was increased 166%!

No New Material

With New Material

Delivery
